

- Defaults to using faceID upon opening the app
- This is the first page that displays upon opening the app and auto-faceID does not work successfully
- This is the main use case for User IDs ; for app access
- One doorbell can have multiple userIDs attached to them

→ Redirects to other standard pages for respective functions

Upon successful login

User ID rules :

- Has userID in form of unique ID or email
- Has username for identifying human names easily
- Password
- Has assigned facial profiles
- Can have multiple doorbells
